

BIG MILE

The standard in CO2
footprint optimization

What is BigMile?

BigMile is the **standard** in **CO2** calculation and **optimization**

It offers you a clear **visualization** of your **Carbon Footprint** developments & **Supply Chain** performance

Integrated tooling in the international CO2 reduction program '**Lean & Green**'

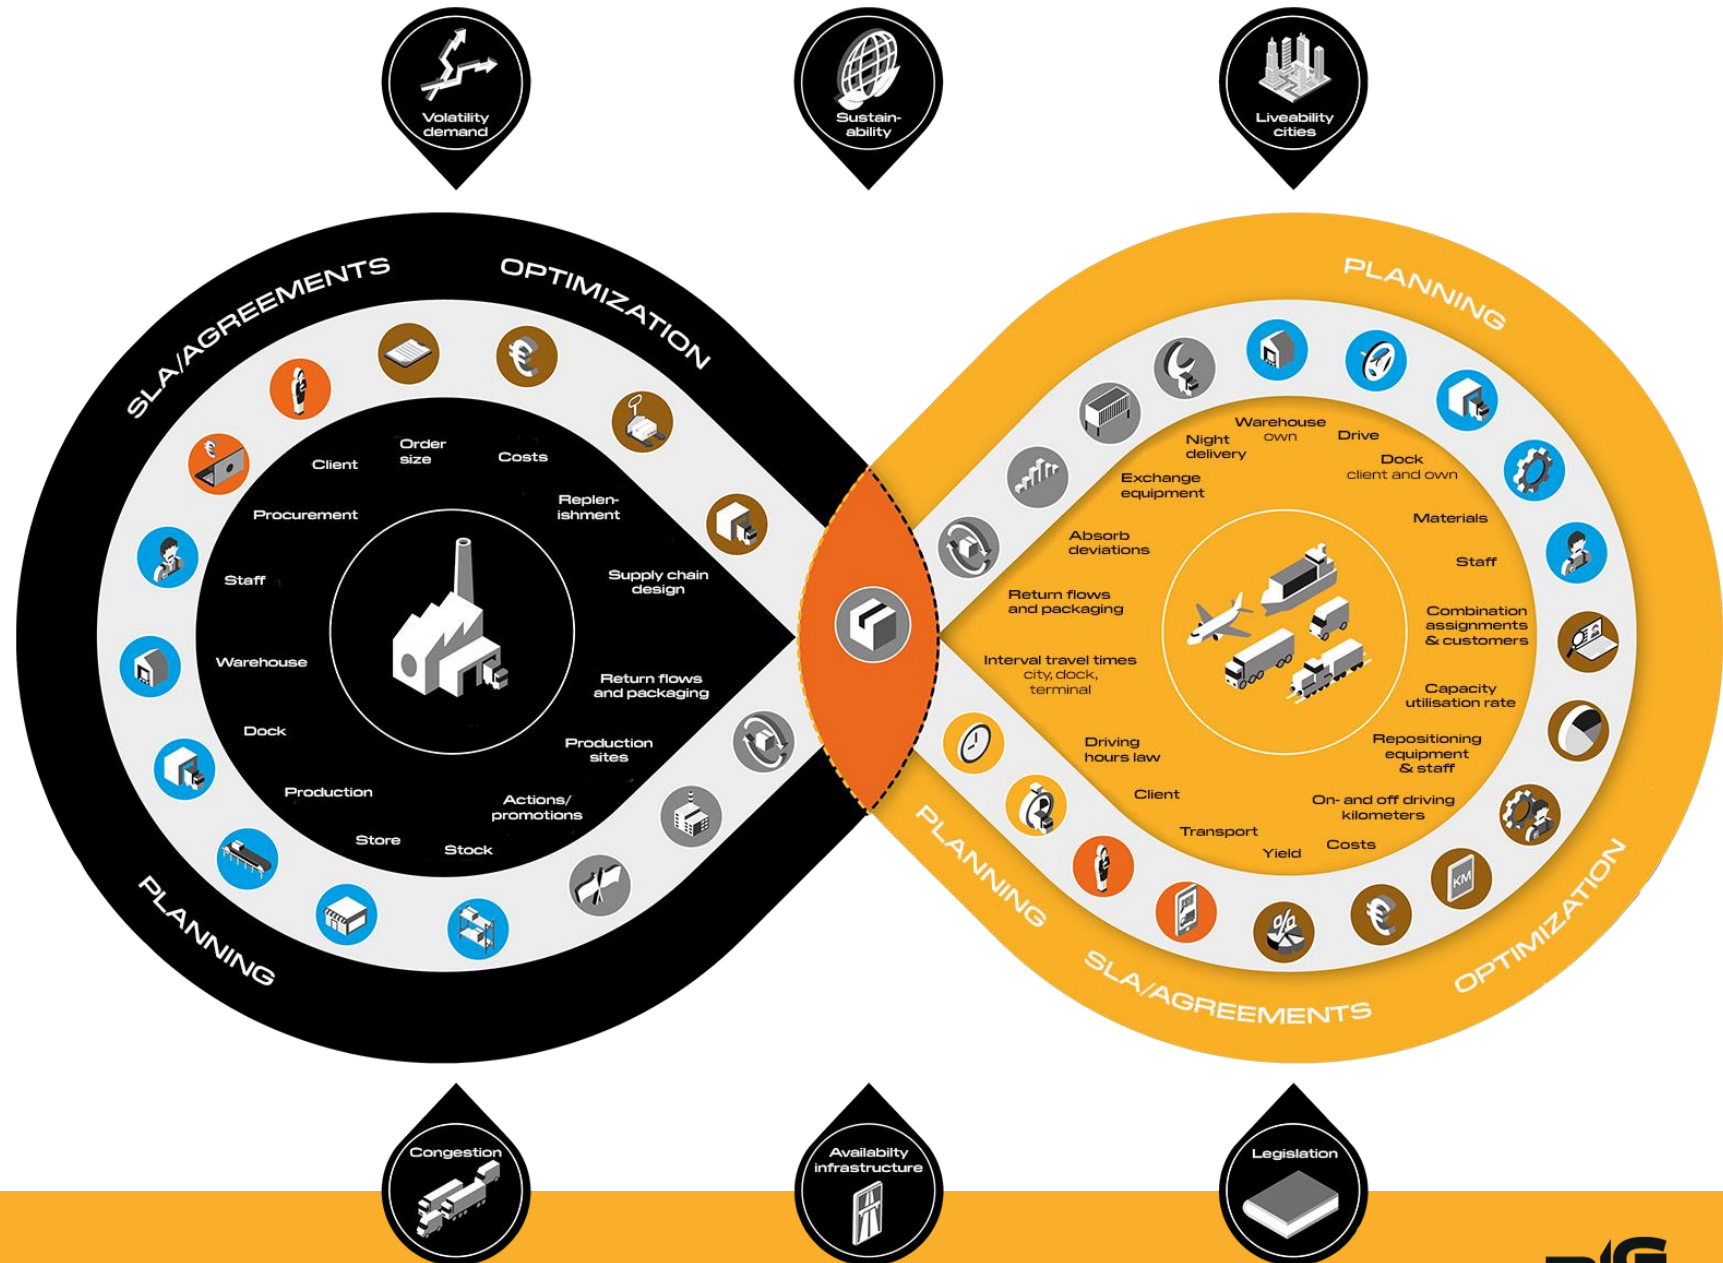

What can BigMile do for you?

It helps to **calculate** and **allocate** your CO2-emissions for:

- ✓ (Future) **Rules** and **regulations**
- ✓ Keeping track of your **sustainable goals**
- ✓ Your **business strategy** and reporting

You need to **work together** in order to optimize your supply chain

Our goal is to visualize the potential improvements you and your partners can make

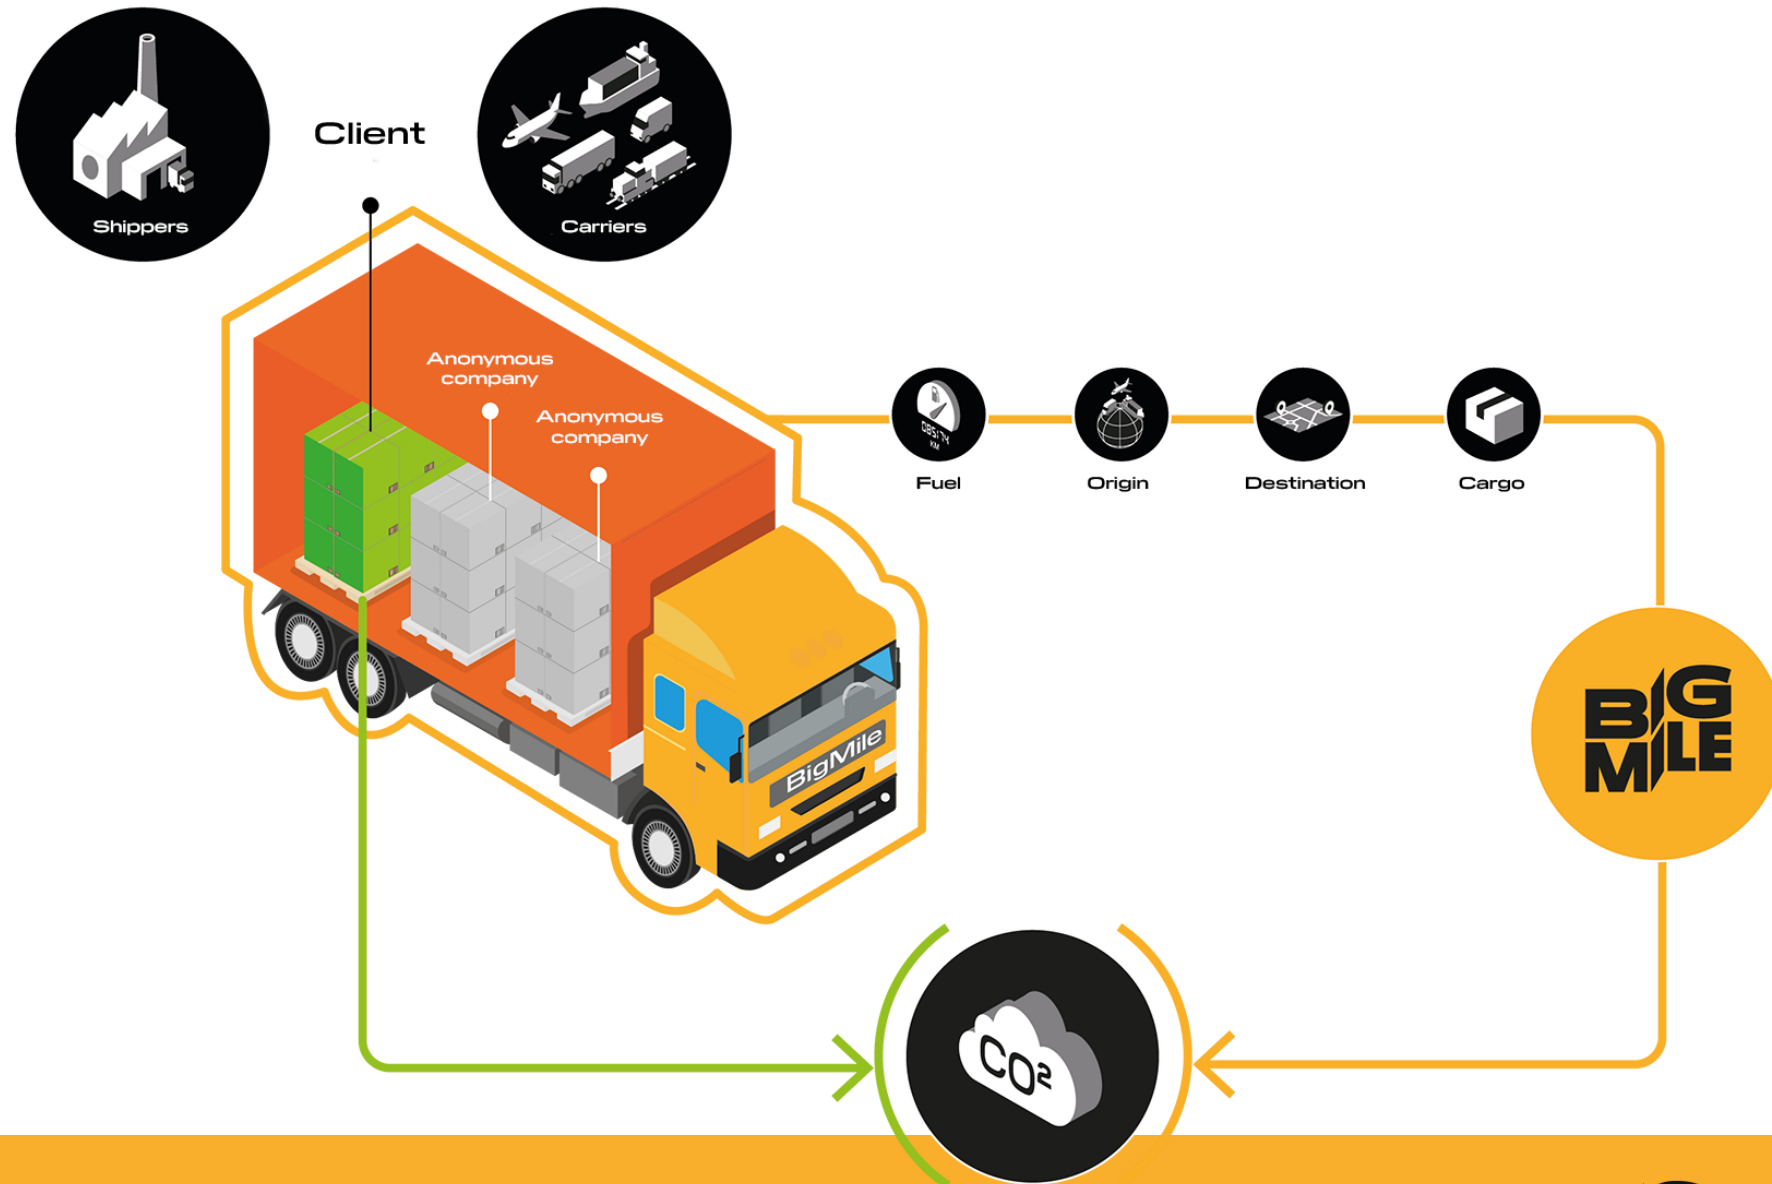

With BigMile, sharing your logistic **data** is in good hands

Our insights make it easy for you to see what to improve, within your own organization or with your supply chain partners & subcontractors by using our fully secured **Data Sharing** platform

Sounds complex?
No worries!

This is the data you
need to collect to **get
started** with BigMile:

What we offer

We have a **platform** that fits every organization, big or small (ambitions)

We make sure our **service** can work and **grow** with you

Carbon Analytics			
	Basic	Premium	Enterprise
Maximum amount of data records	1 mln.	5 mln.	10 mln.
Reporting (static)	●	●	●
Data validation	●	●	●
Interactive dashboard (with dynamic analysis)	●	●	●
Data sharing with partners	●	●	●
Adding several partner data sets		●	●
Making scenario analysis		●	●
Add-ons			
Super data storage (up to 50 mln records)		€	€
Standard API		€	€
Personalised parts			€

Why we are the standard

- ✓ Conform the **EN16258** method
- ✓ **CO2 calculation and allocation**

Industry key figures:

- ✓ **GLEC**
 - ✓ **French Degree**
 - ✓ **CO2Emissiefactoren.nl**
 - ✓ Own key figures also possible
-
- ✓ Certified accountancy statement - **ISAE 3000** *(April 2021 available)*

Use cases

- ✓ **CO2 reporting**
 - ✓ management summary
 - ✓ shipment detail level
- ✓ **CO2 accounting**
 - ✓ calculate CO2 pricing in total, per group or per shipment
- ✓ **Analysis & scenarios**
 - ✓ measure the impact of choices (eg modality shift or deliver frequency)
 - ✓ compare subcontractor performance
 - ✓ 'what if' scenarios
- ✓ **Optimization**
 - ✓ Biggest (CO2) costs quickly identified
