

ai powered mobile mapping

PROBLEM

Smart Cities & Utility companies
need information
about locations

PROBLEM

... but traditional mapping is too:

**expensive
inflexible
slow
labor-intensive**

SOLUTION

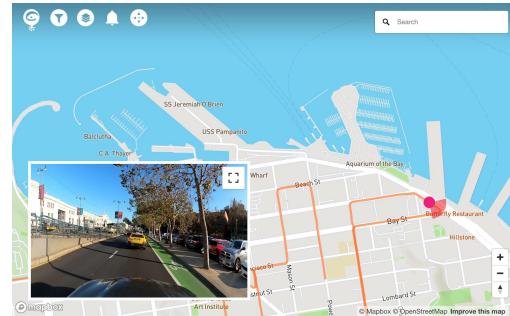

1. DRIVE & RECORD

2. AI IN THE CLOUD

3. HIGH QUALITY GEODATA

*Powered by Artificial Intelligence:
high accuracy, object recognition, efficiency*

GECKO MATICS

OBJECT DETECTION

GECKOMATICS

TREE MAPPING

GECKOMATICS

Value

- Aesthetical
- Environment. Climate comfort: dust, wind, temperature
- Health & mental health benefits

Environmental / Zoning department. Urban tree management

How many? Where? What condition?

Trimming & safety. Disaster damage

Insurance

TREE MAPPING

Climate change

- Carbon capture plan. How many trees need to be planted?
- Underground water management

BENEFITS

AFFORDABLE: eliminate overhead

FAST: results in days, not months

FUTURE-PROOF: easy frequent updates

QUALITY: accurate positioning & measurements

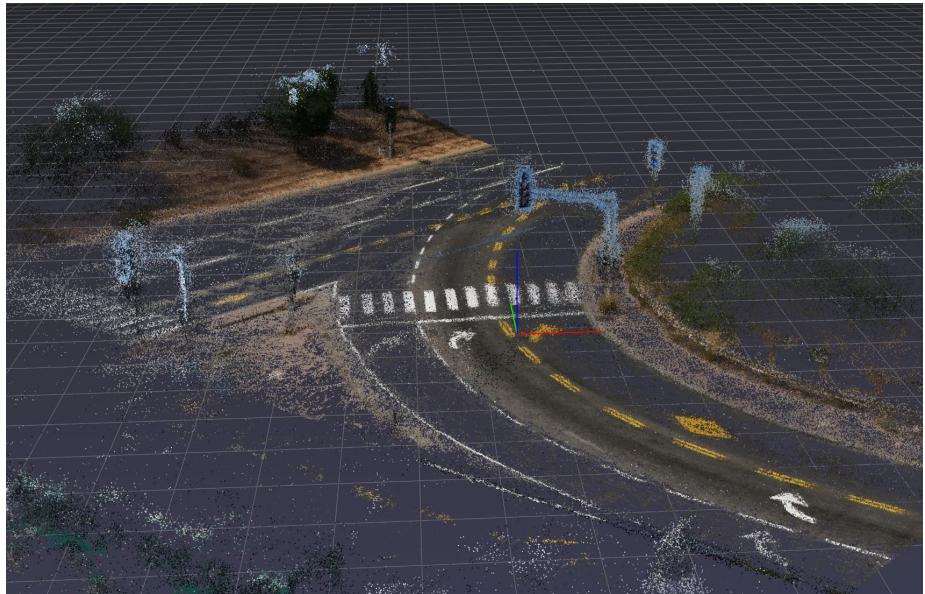

FLEXIBILITY: you decide what and when to map

VALUE: one-stop-shop for all your departments

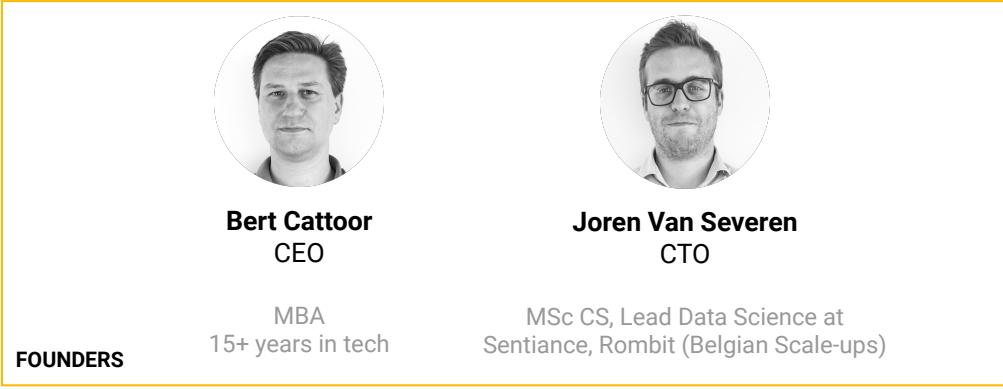

PRODUCT FEATURES

- 360° georeferenced imagery
- Exportable data
- Web GIS application
- User-friendly camera
- Automatic measurement
- Fully GDPR compliant
- Tailored asset inventories
